

# User Guide

## CYCLE TIMER

The CYCLE TIMER controls any 120V equipment such as irrigation pumps, fogger, fans or CO<sub>2</sub> generators on periodic cycles. The output is repeatedly turned ON and OFF for periods corresponding to the ON and OFF times.

### Setting your times

Simply rotate the knobs to set:

**ON Time** from 1 to 60 minutes.

**OFF Time** from 5 minutes to 12 hours.

### Selecting the operating mode

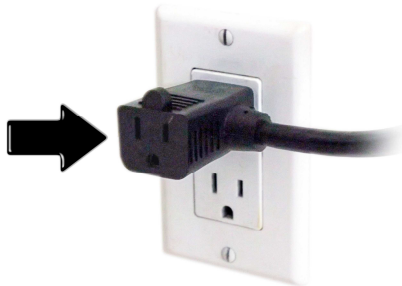

Simply slide the switch to select:

**Day** : the output is activated during the day only.

**24 h** : the output is activated day and night.

**Night** : the output is activated during the night only.

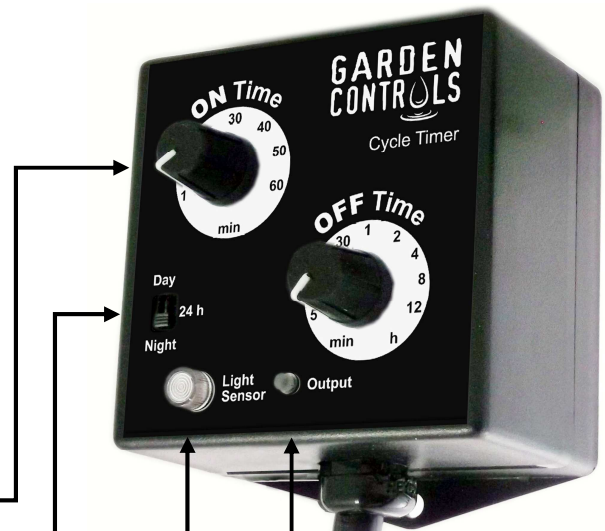

Plug equipment into output cord (piggy back cord).

### Specifications :

Load: 120V 12A

5-ft Piggy Back Cord.

The **LIGHT SENSOR** serves as the day/night detector.

The **OUTPUT** indicator is lit when power is applied to output cord (piggy back cord).
